Shopfloor

Digital shopfloor management enables the efficient control of processes in production and administration

The Shopfloor Board connects all partial solutions to an intuitive, manufacturer-independent working environment - your Shopfloor Management Dashboard. Meeting and collaboration functions give you access to all media content from the network or the cloud. You work with interactive whiteboards, use established video conferencing solutions and combine everything with the content from your participants' presentation devices to create a simple working environment. Existing partial solutions such as websites or applications for analyzing and evaluating your key figures also become part of the solution. Thereby the digital Shopfloor Board is a real all-rounder. If required, your employees can use the interactive screen as a platform for your corporate communication. If no information is called up, the Shopfloor Board displays daily news, weather, the menu, and information on events or ordinances in automatic playlist mode.

✓ Intuitive Kiosk and Work Environment for All Applications

✓ Self-Determined or Automated Information

✓ Meeting, Analysis, and Collaboration Capabilities

✓ Integrates Applications, Dash Boards, Video Conferencing

✓ Promoting Creativity and Collaboration

✓ For more Efficiency in Production and Administration
