Interactive Videowall

User Interfaces in Showrooms, Information or Sales Areas for Interactive Digital Signage Videowalls

Almost all media formats, live sources or streaming sources are supported in your customized presentation environment. Versatile effects stage your product and advertising messages in a special way. Interfaces for sensors such as presence, motion, eye tracking or gender enable impressive interactions with people in the room.

If required, meeting and collaboration functions give you access to all media content from the local network or the cloud. You can work on the videowall with interactive whiteboard and annotation functions, use your established video conferencing solution and combine everything with the content from presentation devices of your meeting participants to create an innovative videowall workspace.

✓ Fascinating Worlds of Experience and Work

✓ Innovative Presentation Style with Videowall

✓ For Brand Staging or Creative Teamwork

✓ Flexible Design and Smart Functions

✓ Simple Content Maintenance for Efficient Operation

✓ More Visibility Thanks to Sustainable Communication
