## Touchscreen Table

Interactive Touch Tables for multimedia Experiences and Virtual Product Information

With multimedia user interfaces for a touch screen table you operate versatile applications for presentation, brand staging, consulting or creative teamwork. Almost all media formats, live sources or streaming sources are supported. Versatile presentation effects stage your product and advertising messages in a special way. Interfaces for sensors such as presence, motion, eye tracking or gender enable impressive interactions with people in the room. The fascinating interactions between real products and virtual media via the integrated sensor and object recognition (token) in the touchscreen table or the interaction with networked screens in the digital workspace also leave a lasting impression.

✓ Fascinating Worlds of Experience and Work

✓ Innovative Presentation Style on the Multi Touch Table

✓ For Brand Staging or Creative Teamwork

✓ Interaction between Real and Virtual Content

✓ Flexible Design and Smart Functions

✓ Simple Content Maintenance for Efficient Operation
